

HYDROGEL 20 / LEFT HAND - PRODUCTSHEET

HYDROGEL 20 – LEFT HAND COOLING BRACE

The IZI hydrogel 20 wrist cooling brace combines function, comfort, and a great fit to reduce wrist pain. Our wrist braces are lightweight, low-profile, with soft neoprene, and easily adjustable by its velcro straps. Our self-cooling wrist brace includes our patented hydrogel cooling technologie. IZI cooling braces are unique in their kind due to their double function the top choice for wrist cooling, support and relief from wrist pain.

The wrist cooling brace is activated by putting it in a bucket of (cold) water for 20 minutes. For additional cooling, the wrist brace can be frozen. This gives about half hour of intense cooling, which is comparable to cooling with ice packs. When the ice has melted, the wrist brace will continue the cooling by evaporation.

NOTE : the hydrogel 20 wristcooler is for the left hand. For the right hand, please go to Hydrogel 21 in the webshop.

MATERIALS USED :

FABRIC 1 WOVEN POLYESTER, 85 GRMS. (COOLING PART)
