

HYDROGEL 24 - PRODUCTSHEET

HYDROGEL 24 – LOWERLEG COOLING BRACE

The IZI hydrogel 24 lowerleg cooling brace combines function, comfort, and a great fit to reduce pain at the lowerleg. Our lowerleg braces are lightweight, low-profile, with soft neoprene, and easily adjustable by its velcro straps . Our self-cooling lowerleg brace includes our patented hydrogel cooling technologie . IZI cooling braces are unique in their kind due to their double function the top choice for lowerleg cooling , support and relief from pain at the lowerleg.

The lowerleg cooling brace is activated by putting it in a bucket of (cold) water for 20 minutes . For additional cooling , the lowerleg brace can be frozen. This gives about half hour of intense cooling , which is comparable to cooling with ice packs. When the ice has melted, the lowerleg brace will continue the cooling by evaporation .

MATERIALS USED :

FABRIC 1 WOVEN POLYESTER, 85 GRMS. (COOLING PART)
FABRIC 2 NEOPREEN (blue color)

FINISHINGS FABRIC 1 + QUICK DRY FINISH
FABRIC 1 + CIRE FINISH

AVAILABLE COLORS BASED ON ABOVE FINISHINGS :

NOTE : THE PRODUCT ON THIS SHEET IS REFERENCE FOR COLORS IN STOCK.

OTHER COOLING BRACES IZI HAS DEVELOPED :

HYDROGEL 20	>	WRIST (LEFT HAND)
HYDROGEL 21	>	WRIST (RIGHT HAND)
HYDROGEL 22	>	ELBOW
HYDROGEL 23	>	UPPERLEG
HYDROGEL 25	>	ANKLE
HYDROGEL 26	>	KNEE

FEATURES :

WEIGHT	50 GRMS. (DRY) 150 GRMS. (ACTIVATED)
COOLING TIME	APPROX. 72 HOURS EVAPORATED COOLING APPROX. 2 HOURS AS ICE BRACE
COOLING METHOD	EVAPORATION AND ICE
FITTING	ADJUSTABLE
SIZES	1 SIZE FITS ALL
MEDICAL CE	YES
